Education

Korea University	Seoul, South Korea
B.A. in Philosophy	Mar. 2020–Aug. 2026 (Expected)
Minor in Public Governance	
Cumulative GPA: 4.32/4.5 (3.95/4.0), Total Credits: 190	

Research Interests

Macroeconomics, International Finance, Economic Growth, Econometrics

Selected Coursework

Economics	Intermediate Microeconomics (A+), Intermediate Macroeconomics (A), Econometrics I/II (A+), Research on Dynamic Macroeconomics (A+), Economics of Strategy and Information (A), Asymmetric Information and Incentive Design (A+), Microeconomic Theory I (in progress; G), Econometric Analysis (in progress; G) (<i>G denotes graduate courses</i>)
Mathematics	Real Analysis I/II (A+), Calculus I/II (A+), Linear Algebra I/II (A+/A), Differential Equations (A+), Topology I (A+), Set Theory (A+)
Statistics	Mathematical Statistics (A+), Introduction to Probability Theory (A+), Statistical Machine Learning (A+)
Logic	Advanced Logic (A+), Symbolic Logic (A), Inductive Logic (A+), Applied Logic (A+)

Research Experience

Political Uncertainty and UIP Deviations: Regime-Dependent Currency Excess Returns (with Kihun Jung — Advisor: Prof. Seunghoon Na), *Working Paper*

- Applied Markov-switching and K-means clustering to U.S. EPU data to classify political uncertainty regimes; estimated regime-dependent Fama regressions for Korea, Japan, and Canada; and documented cross-country heterogeneity in UIP deviations, with stronger regime dependence in Korea under the high-persistence Markov-switching regime definition.
- Developed a signal-extraction framework that maps political uncertainty to regime-dependent Kalman gains and the Fama regression slope, providing a theoretical interpretation of the more negative Fama slope in the high-uncertainty regime for Korea.

Programming

Matlab	Estimated VAR models and computed bootstrap-based IRFs using macroeconomic time-series data in <i>Econometrics II</i> .
Dynare	Conducted calibration exercises for DSGE models in <i>Research on Dynamic Macroeconomics</i> .
Python	Completed a project selecting the best-performing housing price prediction model (ridge, lasso, random forest, boosting) using K-fold cross-validation in <i>Statistical Machine Learning</i> .
R, Stata	Implemented basic regression analysis.

Teaching and Research Positions

Research Assistant for Professor Sangsoo Park

Jun. 2025

Compared the 8th and 9th editions of *Introductory Econometrics: A Modern Approach* (Wooldridge) to identify and document substantive revisions in mathematical notation and econometric terminology for the Korean translation.

Teaching Assistant for Professor Seunghoon Na

Fall 2026 (Appointed)

- Research on Dynamic Macroeconomics

Other Academic Experiences

KU International Finance and Macroeconomics Reading Group, *Presenter* Mar. 2026-Jun. 2026

KU Behavioral Macroeconomics Reading Group May 2026-Present

Honors and Grants

Honorary Student Award (Academic Excellence), Korea University All semesters

Korea University General Scholarship (Multiple Semesters) 2020–2025

Gyeongnam Cultural Foundation Scholarship 2023

IBK Scholarship, Industrial Bank of Korea Foundation 2020, 2023

Gumi City Scholarship Foundation Scholarship 2020

Megastudy Scholarship 2020

Personal

Languages: Korean (Native), English (Fluent), Japanese (Basic)

- GRE: V 159 / Q 168 / AW 3.5 (Mar 2026)
- TOEFL: R 6.0 / L 5.0 / W 4.0 / S 4.0 / Overall 5.0 (Mar 2026)

Citizenship: South Korea
